

### Extreme Adventure Ltd – Risk Assessment

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Electrocution	Spectators, participants and staff	Electrical units are visually inspected for obvious faults. All equipment is PAT tested once a year, cables are covered and only trained and insured staff should have access.	Severity of risk (S)- 3 Likelihood of risk (L)- 1 Overall risk (SxL) = 3  LOW	If sockets are used at the venue, clients are asked to check these prior to event.	Ongoing
Unruly Behaviour	Spectators, participants and staff	The operator's decision is final, refusal to abide by the operators guidance will result in ride refusal & in extreme circumstances closure of the unit.	Severity of risk (S)- 2 Likelihood of risk (L)- 1 Overall risk (SxL) = 2  LOW	If an Extreme Adventure member of staff is not present a supervisor is required.	Ongoing
Tripping over spare equipment or electrical cables	Spectators and participants	Spare equipment stowed away and where possible, electric cables will not cross public pathway.	Severity of risk (S)- 3 Likelihood of risk (L)- 1 Overall risk (SxL) = 3  LOW	Rule must be enforced with a supervisor if an Extreme Adventure member of staff is not present	Ongoing
Unnecessary Injury	Spectators, participants and staff	Ensure that no participants who suffer from neck or back problems, heart complaints, are feeling unwell, suffering effects of alcohol, drugs or is pregnant uses the equipment.	Severity of risk (S)- 5 Likelihood of risk (L)- 1 Overall risk (SxL) = 5  MEDIUM	If any person with the listed conditions uses this equipment against this advice, they do so at their own risk.	Ongoing

### Severity (S)

Severity of Risk is judged by evaluating the effects of the hazard if the risk occurs.

This is evaluated as Minor = 1, Major = 2, Serious = 3

### Risk Likelihood (L)

The likelihood of the harm occurring is evaluated on the following basis:

Unlikely =1, Possible = 2, Likely = 3

### Overall Risk

Overall Risk is calculated by multiplying the figure for Severity (S) x Likelihood (L). The figure calculated is related to the rate of risk as follows

1 to 3 Low, 4 to 6 Medium, 7 to 9 High
